

Red Hills Habitat Teachers' Workshop

During this interactive teacher training led by biologists and professional staff of Tall Timbers, participants will gain a further understanding of:

- Plant & animal species thriving in the Red Hills Region of north Florida and southwest Georgia
- Principles of fire ecology along with the positive ecological impacts of prescribed burns
- Geographical boundaries of the Red Hills Region
- Brief historical framework of conservation efforts and ecological succession patterns in the Red Hills Region .
- Local & regional resources for classroom teachers

This workshop is sponsored by Tall Timbers Research Station & Land Conservancy in partnership with Big Bend Leon Association for Science Teaching, (BLAST). *Space is limited and registration is required.*

Saturday January 30, 2016

9 AM—12:30 PM
